

The eye of the zodiac

ASTROLOGY

Contemporary western astrology lays its data according to the trajectory of the sun which is inscribed on the celestial vault by crossing constellations of stars.

It crosses 13 but only 12 have been part of it, for more than 400 years BC, of what is called astrology.

These 12 signs, you know them. The 13th is that of the Serpentarius. Placed between the Scorpio and Sagittarius, it covers the first days of December and determines calm, wisdom and action. This constellation is smaller than the others and was only taken into account only among the Egyptians. His name "Serpentaire" meant "hunting bird". I take this opportunity to tell you that I want to use, for the 4th constellation, the usual name of "Cancer" but let us remember that it is called actually "Beetle". This was the name given to this constellation at the time of the Egyptians. The beetle being the harbinger of the sun returning to earth.

The beetle is a powerful totem, a symbol of rebirth and eternity. It was worn as a mask with which godmen adorned themselves. Tutankhamun wore it as a pectoral jewel during the ceremony of his coronation. A beetle melted in gold. Gold being considered by the Egyptians as the flesh of the gods.

Because astrology, in fact, has existed for more than 2000 years before our era. She belonged to a scholarly tradition often closely related to astronomy, alchemy or medicine.

ROUTINE

**I'm going to take you on a somewhat special journey tonight.
An astral journey where only the light of the spirit will be able to guide you.
The mind is a fantastic tool.
You know you can travel in a dream but what you don't know
maybe not it is that this dream can reach reality.
You can get lost there but you can also find there;**

The present reality but also the past reality.

**You will think of your zodiac sign or the sign of a friend or friend
and I will find it through your mind.**

**Now.... Take the map.
There are two faces representing the two realities.
We will start with the face of the zodiac in white letters: the present reality**

**Look at the column of the moon, the column of light, look for your sign if it does not
is not there flip the card: past reality.
as soon as you see your sign look at the crystal* in the light and look for the color
which evokes your sign, you are thus going to send me an image.**

**Now let's continue:
Look at the column of the star and do the same, as soon as you see your sign,
look at the crystal* to transmit the image to me.**

**do the same with the sun column written in white.
And now with the infinity sign column.**

Example reading of the Sign:

**Read with famous people of the same sign, highlight
the elements of the sign and the compatibilities with another sign, highlight the planet
and its characteristics in order to define the personality etc.
You can do mentalist work before revealing the sign.
Take inspiration from books on the signs of the zodiac to make your own
routine.**

Support for reading:

**You can ask the spectator to close their eyes each time they see their sign
in one column, it will give you the vision information to move to the other column.
*You can also use like me a piece of prism crystal to add mystery to clairvoyance or a
transparent and colored stone etc.**

11 Capricorn

12 Aquarius

When the spectator chooses his sign in the first column written in white, this counts for 1, in the second for 2, the third for 4 and the 4th column for 8.

By adding the figures we obtain a value which corresponds to a sign of the zodiac (see the table above).

When he chooses in the column written in gold by turning over the card, the value is always zero whether he sees it or not his sign.

So only the column written in white has a value that can tell us the sign.

If the spectator chooses Capricorn, he sees it in the first column: 1 point

He sees it in the second column: 2 points

He does not see it in the third column, he turns the card over to see it: 0 point

He sees it in the fourth column: 8 points

Total value: 1+2+8 = 11 the value of Capricorn

BONUS

"PREDICTION" or "DIVINATION"

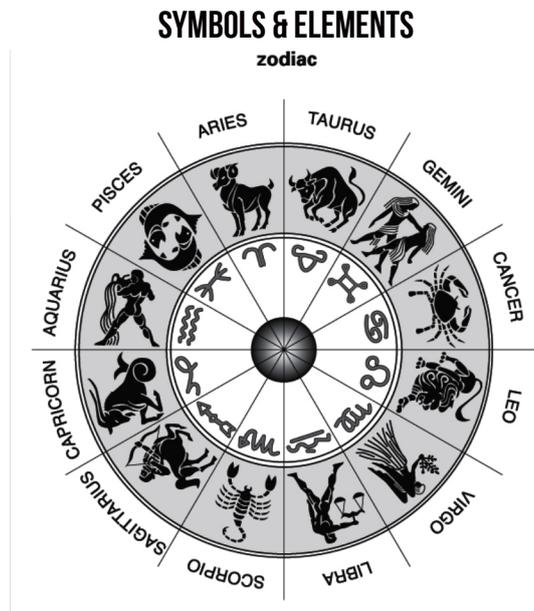

" PREDICTION "

By knowing the sign of the spectator you have a head start on him, you can for example tell him that you had made a prediction of the sign. For this prepare in your pocket 6 envelopes with double outputs with inside the written sign or its symbol.

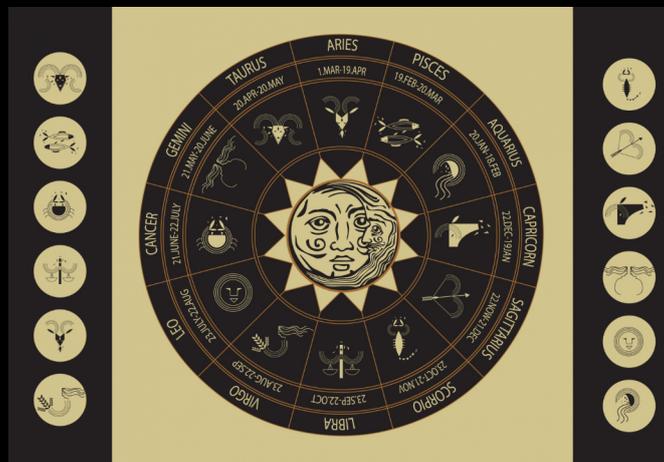

You can also insert a zodiac coin (Leo, Virgo etc.) in the envelope of the "WALLET CLOVER" from www.magicclover.shop and reveal his sign in the envelope.

" DIVINATION "

You can involve a second spectator by asking him to draw the symbol of his sign on a white card and to perform the "PEEK" with the "WALLET CLOVER"
